

# 2025 INTERNATIONAL SUMMER SCHOOL

LESTER B. PEARSON SCHOOL BOARD

LBP LESTER B. PEARSON SCHOOL BOARD  
International Programs

Lester B. Pearson School Board, in collaboration with Canabridge International and its affiliation LAC, will be offering an international STEAM program during the 2025 summer months. This program provides rich second language learning opportunities for international students to take part in classroom activities focused on Science, Technology, Engineering, Art and Mathematics (STEAM), all taught by expert English teachers. As part of our STEAM program, students also take part in Canadian cultural experiences throughout their stay, experiencing the natural beauty and cultural history of Canada. They will visit the capital of Canada, Ottawa; Toronto, a vibrant metropolis; Montréal, where LAC is located; and other enjoyable local destinations. Our expert teachers scaffold and support each student's English speaking, listening, reading and writing skills in a beautiful Canadian setting. Our STEAM summer program has operated for more than a decade and it guarantees to provide international students with a unique, unforgettable experience.

Lester B Pearson School Board is the largest English School Board in the province of Quebec. It has welcomed international students from all over the world to study programs in our schools, benefitting from the experience in a Canadian educational setting.

Montreal is the 2nd largest city in Canada, with a significant contribution to Canadian and Quebec history and culture. It embodies a unique blend of Canadian history, French culture, historical architecture, and 21st century innovation. It's location in Canada as well as its bilingual environment offers rich opportunities for educational, commercial and personal growth.

## ESL FSL

We provide student-centred second language learning experiences with a variety of language learning programs. We develop our programs understanding there are a range of second language abilities, and our teachers instruct students with the objective of moving them along their continuum of learning.

## STEAM

The concept of STEAM international education was founded in the United States. It aims to strengthen children's innovation in Science, Technology, Engineering, Art and Mathematics, integrating education with practical skills as the core. We have developed original lessons with second language learning embedded in STEAM projects, all to help students master the ability to create the future in their own as well as a second language.

## STUDY AND EXPERIENCE SUMMER CAMP

During the summer program, students will learn in English, practicing daily to improve their oral and writing skills. Our experienced English teachers provide unforgettable lessons and facilitate their exploration of STEAM related projects. The students will also interact with local students their age, as well as the public at large as they experience their cultural activities in Montreal, Quebec, Ottawa and Toronto.
